

Need medical care where you live? **We come to you!**

We believe that everybody should have the right medical care, delivered at the right place, at the right time. For many people who have difficulty getting to their medical appointments, **Housecall Providers is the right choice.**

Who Housecall Providers is a “medical clinic on wheels.” We make primary care house call visits to people who have a hard time getting to their doctor appointments. We help with referrals, coordinate care with other doctors, and make sure our patients are OK or “tucked in” when they come home from the hospital. We also offer pharmacy and nursing so that everyone has the support they need, right in the comfort of where they live.

What Primary care is best delivered by a team. **Our home-based care team includes a primary care provider, social worker and registered nurse** who all work together to deliver the right care at the right time. After we become your primary care provider, you can still see specialists such as a cardiologist or pulmonologist.

Where We deliver medical care in the home to those who qualify, and who also live in Multnomah, Clackamas or Washington counties.

When Once you are signed up with Housecall Providers, we’ll visit you to hear about your health history and perform a physical exam. **A provider will visit you monthly—or more often if you need medical attention**—or arrange for another type of support, such as nursing, pharmacy or other basic needs.

How Housecall Providers accepts a wide variety of insurance plans like **Providence, UnitedHealthcare, Regence, CareOregon**, and many more.

Next steps Please call our intake office at **971-202-5500** to see if you qualify to receive care from Housecall Providers. If so, a member of our team will walk you through the next steps to start receiving medical care where you live. We look forward to talking with you!
